

PRESTON PRIMARY SCHOOL IMPROVEMENT PRIORITIES

COAST
ACADEMIES

Leadership and Management

Introduce meaningful ways to measure all aspects of learning, including physical and emotional development, communication, social and independence skills.

To ensure all school leaders fully understand and implement the core principles that underpin the Preston approach to Teaching and Learning.

Establish consistently high quality autism friendly environments. It is not "How smart are you?" It is "How are you smart?"

Teaching, Learning and Assessment

Capitalise on staff expertise to build wider community partnerships which integrate the school into the heart of the community.

Outstanding staff development that secures the highest possible standards in Teaching and Learning.

Leadership pathways developed through a coaching approach and an outwardly looking team.

Personal Development, Behaviour & Welfare

Expand the school values conversation to include tracking and rewards that strengthen pupils as independent, robust learners.

Attendance: Ensure all children value education and rarely miss a day.

Outcomes for Pupils

To ensure that pupils' progress and attainment are above national averages, with a particular focus on raising attainment of disadvantaged pupils.

Outcomes improved through developing even greater curriculum autonomy across the school.

Prepare children for a multicultural world, and a diverse and changing workplace.

Early Years Provision

Further develop a Maths Mastery approach in conjunction with regional Maths Hub.

Use curriculum autonomy to bring more aspects of risky play into the everyday provision.

Continuous Provision extended from Foundation Stage into Year 1.

Coast Academies Key Priorities

To clarify our shared understanding of high quality teaching and learning and to provide appropriate challenge and support for our schools linked to this.

To create clear pathways for leadership development working within and beyond our own MAT.

To continue to grow and develop our MAT to allow us to benefit from economies of scale, further collaboration and sharing of expertise.
